

MAX CORE B

The Max Core B is the compact square model in the range, with a symmetrical diamond shape that combines style and simplicity. Thanks to its compact size, the Max Core B fits seamlessly into smaller spaces. The Max Core B can be easily customised by adding extra layers or battery packs for increased heat storage. Practical door handles are also available as an option.

PRODUCT BESCHRIJVING

DE MAX CORE B: COMPACT AND POWERFUL

The Max Core B is a compact soapstone stove that takes up very little space, while offering at the same time all the benefits of efficient, long-lasting heat storage. This model combines pleasant radiant heat with remarkably low wood consumption, making it an excellent choice for anyone who wants to heat their home comfortably and sustainably.

The Max Core B is delivered as a practical flat-pack kit, with the firebox parts and soapstone carefully prepared. This ensures a quick, neat and relatively straightforward installation. As the stove is delivered in separate parts, it can also be easily installed in hard-to-reach places, such as on an upper floor or in homes with limited access.

What makes the Max Core B extra special is its modular design. The stove can be expanded as desired with additional layers above and below the firebox. This not only increases the heat storage capacity, but also allows you to adjust the height of the fire to suit the room and your comfort. This makes the stove particularly well-suited to interiors where both aesthetics and functionality are important.

A HYBRID ELECTRIC HEATING PACKAGE IS OPTIONAL FOR THE MAX CORE

Make your soapstone stove even smarter with the optional hybrid electric heating package, available for all models in the Max Core and Max Massiv ranges. Wood and electricity come together in a single system, with the soapstone acting as a thermal battery that stores heat and releases it evenly, without temperature fluctuations or dry air, but with the familiar cosy feel of a soapstone stove.

Do you have solar panels? If so, you can easily store surplus solar energy in the soapstones, ensuring that the electricity you generate yourself is used to the full rather than going to waste.

ARE YOU INTERESTED IN THE ALTECH MAX CORE B SOAPSTONE WOOD-BURNING STOVE?
