

MAX CORE H

The Max Core H stands out thanks to its taller glass panel, which showcases the flames to even greater effect. This model is ideal when a striking view of the fire is the main priority, or when a vertical design better complements the interior. The Max Core H can be expanded and customised to suit your taste by adding extra layers or heat storage packs for greater heat retention. Practical door handles are also available as an option.

PRODUCT BESCHRIJVING

DE MAX CORE H: COMPACT AND POWERFUL

The Max Core H is a compact soapstone stove with a tall design, created for those seeking efficient heat storage in an elegant and spacious design. Thanks to its slim profile and tall design, this model takes up relatively little floor space, whilst still offering all the benefits of long-lasting heat release and low wood consumption.

The Max Core H is delivered as a practical flat-pack kit, with both the firebox components and the soapstone carefully prepared for quick and neat installation. As the stove is delivered in separate parts, it can easily be installed in hard-to-reach locations, such as on an upper floor or in homes with limited access.

What makes the Max Core H special is its modular design. The stove can be extended as required with additional layers above and below the firebox. This not only increases heat storage but also allows you to adjust the height of the fire. This makes this model particularly appealing in rooms where a taller fire is desired, such as a dining room.

A HYBRID ELECTRIC HEATING PACKAGE IS OPTIONAL FOR THE MAX CORE

Make your soapstone stove even smarter with the optional hybrid electric heating package, available for all models in the Max Core and Max Massiv ranges. Wood and electricity come together in a single system, with the soapstone acting as a thermal battery that stores heat and releases it evenly, without temperature fluctuations or dry air, but with the familiar cosy feel of a soapstone stove.

Do you have solar panels? If so, you can easily store surplus solar energy in the soapstones, ensuring that the electricity you generate yourself is used to the full rather than going to waste.

ARE YOU INTERESTED IN THE ALTECH MAX CORE H SOAPSTONE WOOD-BURNING STOVE?

Experience the wonderful warmth and admire this stove in the showroom at one of our dealers or at the Experience Centre of HAVÉ Verwarming
