

MAX CORE W

The Max Core W is the wider model in the range and offers a panoramic view of the fire. With its broad silhouette, the Max Core W forms a striking focal point in the room and is ideal for open-plan living areas or spaces where the stove is intended to be an eye-catcher. Thanks to its modular design, the Max Core W can easily be extended with additional stone layers, allowing you to tailor the stove entirely to the space and your personal preferences. This means you can always choose the version that fits seamlessly with your interior. Optional door handles are available for added convenience.

PRODUCT BESCHRIJVING

THE MAX CORE W: WIDE FIELD OF VIEW, POWERFUL HEAT

The Max Core W is a compact soapstone stove that takes up little space, yet offers all the benefits of efficient, long-lasting heat storage. What sets this model apart is its wide fire view, which adds extra atmosphere and creates a sense of space in the room. This makes the Max Core W ideal for those who not only want comfortable heating, but also want to enjoy the fire to the full.

The Max Core W is supplied as a practical flat-pack kit, with both the firebox components and the soapstone carefully prepared for quick and neat installation. As the stove is delivered in separate parts, it can also be easily installed in hard-to-reach locations, such as on an upper floor or in homes with limited access.

One of the most distinctive features of the Max Core W is its modular design. The stove can be expanded as required with additional layers above and below the firebox. This not only increases the heat storage capacity, but also allows you to tailor the appearance and fire experience even more closely to your interior and lifestyle preferences.

A HYBRID ELECTRIC HEATING PACKAGE IS OPTIONAL FOR THE MAX CORE

Make your soapstone stove even smarter with the optional hybrid electric heating package, available for all models in the Max Core and Max Massiv ranges. Wood and electricity come together in a single system, with the soapstone acting as a thermal battery that stores heat and releases it evenly, without temperature fluctuations or dry air, but with the familiar cosy feel of a soapstone stove.

Do you have solar panels? If so, you can easily store surplus solar energy in the soapstones, ensuring that the electricity you generate yourself is used to the full rather than going to waste.

INTERESTED IN THE ALTECH MAX CORE W SOAPSTONE WOOD-BURNING STOVE?
