MAX B SERIE

The Max is a new, sleek range of wood stoves consisting of three different models. When designing this series, the choice was made to use soapstone combined with a steel frame. Because of this steel frame and recessed soapstone, the Max series wood stoves have the sleekest design of all soapstone stoves.

ECLIPS
SERIE

Maximum efficiency, that is what you'll get with a soapstone wood-burning stove from the Eclips series. The Eclips features a smoke flue system measuring over 2 meters. Because of this, flue gases have more time to transfer warmth to the soapstone. The result is a maximum efficiency between 86 to 89%. On top of that, the Eclips, which consisting soapstone and cast iron, offers a wonderful view of the flames. And last, but certainly not least, the soapstone allows you to enjoy a healthy (infra-red) heat.
